DETAILED ACTION

1. This office action is in response to the application filed on March 04, 2002, in which claims 1-26 are presented for examination.

Allowable Subject Matter

2. The present application has been thoroughly reviewed. Upon searching a variety of databases, the examiner respectfully submits that claims 1-26 are allowable in light of the prior art made of record.

Reason For Allowance

3. The following is an examiner's Statement of Reasons for Allowance: The present invention is directed to a method for calculating a transformation cost for a transformation operation n accumulation that transforms a source node in a source XML document to a target node in a target XML document. The closest prior art, Su et al., (Article entitled "Automating the transformation of XML documents) is directed to an algorithm that discovers an efficient sequence of operations for transforming a source document schema into a target document schema based on our cost model. On the other hand, Lee et al., (US Patent no. 6,480,865) is a method and a system for transforming an XML document to produce a transformed XML, wherein the transformed XML document can be processed by an XML processor. However, Su et al., and Lee et al., either singularly or in combination, fail to anticipate or render obvious the recited features "a cost module for measuring a transformation cost for measuring the preservation of data capacity contained within a source XML document, that is associated with a source schema, when transforming said source XML document to a target XML document that is

Art Unit: 2172

associated with a target schema using a set of transformation operations" in claim 10; and "calculating a transformation cost considering said data loss, potential data loss and impact of said operands for said transformation operation" in claim 1. These features, in conjunction with all other limitations of the dependents and independent claim renders claim 1-26 allowable.

4. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to resolve any informalities remaining therein before the application is passed to issue. This will avoid possible delays in the issue process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean M. Corrielus whose telephone number is (703) 306-3035. The examiner can normally be reached on Monday - Friday (12:00pm - 7:30 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E Breene can be reached on (703) 305-9790. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
